

Enterprise Crew Management Solutions for Railroads, Barges, Airlines, Oil & Gas, Mining and Large Fleet Operations

❖ **PROVEN Enterprise Solution**

- Full Featured Enterprise Solution.
- In use since 2009 by large crew hauler serving Fortune 500 U.S Railroads
- Millions of schedules, trips, GPS, events and other data served.

❖ **QUICK Return on Investment**

- Low upfront Costs
- Ongoing costs limited to mobile device data plans and monthly user based licensing fees.

❖ **REAL TIME Optimization**

- Constantly optimizes based on Routes, Vehicles, Schedules, Shifts, Driver Availability, Vehicle types, Hubs, Trip type, Hours of Service rules etc., to drive resource optimization, legal compliance and cost savings.

❖ **CREW Management Features**

- The core of the solution includes a scheduler and optimizer that assign trips to mobile vehicles and crew while taking into account real-time events and changes. Shifts, work schedules, yard dailies, etc., can be set up and managed. The solution supports unlimited clients, HUB's, Point of Service and a range of pre-designated roles and permissions.
- Also supported are a full range of trip management options that help Companies assign trips, queues, track events, monitor vehicles and their statuses in real-time, monitor compliance to Hours of Service rules, etc. The history trip trace feature helps from both a customer service and operational perspective.

❖ **UBIQUITY of Solution**

- Use with any Android Smartphone or tablet (not stuck to proprietary hardware)
- Choose from a wide variety of Android devices

❖ **AUDITABILITY**

- Supports full auditability
- Permission based approval/exception handling

❖ **SCALABLE & SUPPORTED Solution**

- Scalable to handle very large volumes.
- Supported 24/7.

❖ **CLIENT View**

- Supports permission based client view to trips including on mobile devices and ability to create, assign and edit trips remotely

❖ **UNIVERSALITY**

- Our approach is to drive towards "Platform Universality". What this means is that large operators could operate several transportation business lines on a single platform delivering significant cost savings for the Enterprise.
